

# Introducing Clockify, a time sheet app

If you want or need to monitor the time you spend on WISE, we recommend using [Clockify](#). You can join the WISE team account with preset categories, projects, and tasks that align with the work we do. You will also be able to understand how other team members on Clockify spend their time.

Request an account [here](#). The app has also been added to the onboarding process. If you haven't completed the onboard module, check out the [Learning Centre](#).
